About our Company

APB Services, LLC, provides industry-leading consultative information technology (IT) services. We empower employees, streamline workplaces, and modernize legacy processes with innovative solutions. By leveraging technology and efficient processes, we deliver superior IT services that exceed client expectations.

Core Competencies

- ✓ M365 Modern Workforce and Office Productivity
- ✓ Cloud Platforms | Enterprise Collaboration | Migration
- ✓ Generative AI, CoPilots/Agents, & Strategy
- ✓ AI Readiness, Integration, & Implementation

Experience

With a long-standing track record of success and extensive experience delivering complex solutions, our team has successfully delivered projects ranging from small-scale implementations to enterprise-level solutions. We have worked alongside leading organizations across state, local, federal, and education sectors, including the Department of Defense (DoD) and the Defense Contract Management Agency (DCMA). Collaborations include industry leaders such as Leidos, General Dynamics, Raytheon, Boeing, and Honeywell, ensuring mission-critical outcomes and exceptional performance.

Differentiators

- Subject matter expertise in understanding intricacies while tracking state-of-the-art trends
- Concise work breakdown structures to maintain efficiency and accuracy
- Minimal overhead and on target project management
- Veteran Preference Hiring

Certifications

Woman-Owned Small Business (WOSB)

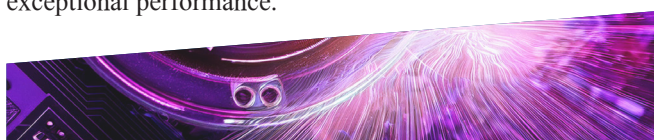

Service-Disabled Veteran-Owned Small Business (SDVOSB)

Veteran-Owned Small Business (VOSB)

Cybersecurity Maturity Model Certification Level 1 (CMMC)

Past Performance

DCMA

Systems Operations Specialist

Our team delivers enterprise-grade SharePoint solutions, including architecture design, system hardening, and compliance with STIG standards. We ensure stability and uptime while managing patching and security. With proven experience in large-scale migrations—from SharePoint 2010 to 2016 and GCC High O365—we provide end-to-end support and troubleshooting for systems and users.

Western Migrations

Our organization led Western Region migration initiatives, overseeing complex transitions from SharePoint 2010 to 2016 utilizing Metalogix Content Matrix. We successfully migrated CMO, Teams, and project environments into optimized structures aligned with streamlined backup and restore processes through Metalogix StoragePoint and RBS externalization. Our team coordinated closely with Information Resource Managers (IRMs) to ensure seamless migration of site structures, content, and permissions, delivering secure, efficient, and fully compliant solutions across enterprise environments.

COTS Management

Our team managed enterprise COTS tools including Metalogix Content Matrix, StoragePoint, TITUS, Power Control, and AgreeYa Quick Apps. We maintained detailed installation and configuration documentation, scheduled updates and patches through development environments, and ensured rapid resolution of production issues to maintain system stability.

SWAT (Skilled with Advanced Tools)

Our team led specialized SWAT efforts and provided expert SharePoint architecture for enterprise environments, including design, sizing, configuration, taxonomy, and governance. We developed custom SharePoint solutions—extensions, web services, web parts, lists, templates, and features—while establishing policies, guidelines, and secure authentication/federation frameworks. We reviewed and approved third-party features, supported RFI/RFP processes, and delivered top-tier SharePoint support. Acting as project managers and business analysts, we drove major initiatives such as DD577 with precision and compliance.

Military Avionics

Our team gathered complex business requirements across global satellite offices and developed scalable taxonomy and governance frameworks for organizations with 10,000+ users under strict governmental security policies. We designed secure ADFS solutions to support non-Active Directory users across multiple international locations, ensuring seamless access and compliance.
